

DATA ANALYSIS COMMITTEE MEETING

May 21st

Virtual

Facilitator:			
Meeting Attendees:	Committee: Francisco Calderon, Joe Botting, Alex Kontras, Johanna Schulte, Rebecca Long, Crystal Houston, Gustavo Perez Staff: Alyssa Anten, Kate Meyer, Maddie Martin		
Time Convened:	2:03 PM	Time Adjourned:	3:00 PM

Approval of Minutes – February 19, 2026			
Motion by:	Francisco Calderon	Support from:	
Discussion	New committee additions: Crystal and Joe		
Amendments			
Conclusion	All in favor, motion passes		
CoC Staffing Updates		Alyssa Anten	
Discussion			
Kate Meyer is new HMIS System Administrator; Alyssa Anten promoted to Operations Director - Kate New Staff Facilitator of Data Analysis Committee Maddie Martin is new CoC Administrative Coordinator (started 5/18). Welcomed 2 new committee members: Crystal Houston and Joe Botting.			
Family Promise Shelter Report		Francisco Calderon	
Discussion			
Francisco provided packet sharing Family Promise Shelter data from May 2025 - May 2026 (Data is pulled directly from HMIS and shared from ICCF) - 52 housing units available - 133 families served, 392 people - Families in Shelter: 49, Total people: 209 - Families in Overflow: 36, Total people: 133 - Rooms are being utilized 91% - Number of families in overflow list are starting to pick up due to weather/school year. Suggestion raised to gather similar data for other types of shelters/resources.			
PIT Count Data Review		Alyssa Anten	
Discussion			
PIT Count is a 1-night federally required census count of homeless population. Gathered by street teams.			

DATA ANALYSIS COMMITTEE MEETING

May 21st

Virtual

- This year was Jan. 28, 2026.
- Data is affected by weather conditions, counting methodology, and other external factors.
- More counters for 2026 tally.

Alyssa shared PIT Count Data

- 2026 numbers were lower than previous years. This is likely a result of weather conditions. Inversely, emergency shelter numbers were above average.
- Transitional housing was higher in 2025 because many TH-RRH projects were added that year. In 2026, the TH component of TH-RRH projects was not utilized as much by service providers, specifically for the DV providers.
- Still investigating possible reasons why disabled individuals count is lower than last year.
- Youth count is lower in 2026, according to the PIT Count.
- Chronic and Veteran homelessness numbers remain consistent from last year, while disabled unhoused number decreased.
- 48% of unhoused are Black, African American, or African. White is the next largest category, with Hispanic being second largest.
- Age is evenly distributed, although we are keeping an eye on the increase in those age 55+

Dwelling Place is working on leasing approx. 50 vacancies at Verne Barry Place unit by the end of August.

Action Items	Person Responsible	Deadline
Investigate potential reasons why disabled individuals count is below average for 2026 PIT Count	Alyssa and Kate	
Develop an analysis of age distribution changing over time, factoring in the type of inventory available at those times.	Kate Meyer	
Interest in tracking chronic homelessness tracking/referrals/resource inventory as it relates to the total number	Kate Meyer	
HIC Data Review		
Discussion		
On the same night as PIT Count, CoC also conducts Housing Inventory Count, which measures beds available. Only federally defined beds are counted; there are other beds that aren't necessarily included on the HIC. - 2,833 beds available on Jan. 28, 2026.		
Next Steps/Action Items		Francisco Calderon
Discussion		
n/a		
Adjournment
